 This is a GROUP assignment. You have each been assigned a letter - A, B, or C. You should complete the step assigned to you in each problem.

1.  $y = 2x^2 - 4x - 6$

<p><b>PERSON A DOES THIS STEP</b></p> <p>Factor the constant of out the first two terms:</p> $y = 2(x^2 - 2x \quad ) - 6$ <p>What number must be added, to complete the square? <math>\left(\frac{-2}{2}\right)^2 = 1</math></p> <p>Circle one: The parabola opens UP / DOWN.</p>	<p><b>PERSON B DOES THIS STEP</b></p> <p>Finish the process, to write the equation in vertex form:</p> $y = 2(x^2 - 2x + 1 - 1) - 6$ $y = 2(x-1)^2 - 2 - 6$ $y = 2(x-1)^2 - 8$ <p>Circle one: The vertex is a MAX / MIN</p>
<p><b>PERSON C DOES THIS STEP</b></p> <p>What are the coordinates of the vertex?</p> $(1, -8)$ <p>What is the equation of the axis of symmetry?</p> $x = 1$ <p>What are the x-intercepts for this graph?</p> $0 = 2(x-1)^2 - 8$ $\frac{8}{2} = \frac{2(x-1)^2}{2}$ $4 = (x-1)^2$ $\pm 2 = x-1$ $1 \pm 2 = x$ <div style="border: 1px solid black; padding: 5px; display: inline-block;"> <math>(3, 0)</math> and <math>(-1, 0)</math> </div>	<p><b>PERSON A DOES THIS STEP</b></p> <p>Graph the parabola, include 5 points and axis of symmetry:</p> 

2.  $y = -x^2 + 4x$

PERSON B DOES THIS STEP

Factor the constant out of the first two terms:

$$y = -1(x^2 - 4x \quad )$$

What number must be added, to complete the square?  $(\frac{-4}{2})^2 = 4$

Circle one: The parabola opens UP / **DOWN**.

PERSON C DOES THIS STEP

Finish the process, to write the equation in vertex form:

$$y = -1(x^2 - 4x + 4 - 4)$$

$$y = -1(x - 2)^2 + 4$$

Circle one: The vertex is a **MAX** / MIN

PERSON A DOES THIS STEP

What are the coordinates of the vertex?

$$(2, 4)$$

What is the equation of the axis of symmetry?

$$x = 2$$

What are the x-intercepts for this graph?

$$0 = -(x - 2)^2 + 4$$

$$(x - 2)^2 = 4$$

$$x - 2 = \pm 2$$

$$x = 2 \pm 2$$

$$(4, 0)$$

$$(0, 0)$$

PERSON B DOES THIS STEP

Graph the parabola, include 5 points and axis of symmetry:

3.  $y = 2x^2 + 12x + 20$

PERSON C DOES THIS STEP

Factor the constant out of the first two terms:

$$y = 2(x^2 + 6x \quad ) + 20$$

What number must be added, to complete the square?  $(\frac{6}{2})^2 = 9$

Circle one: The parabola opens UP  
DOWN.

PERSON B DOES THIS STEP

What are the coordinates of the vertex?

$$(-3, 2)$$

What is the equation of the axis of symmetry?

$$x = -3$$

What is the y-intercept for this graph?

$$y = 2(0+3)^2 + 2$$

$$y = 2(9) + 2$$

$$y = 20$$

$$(0, 20)$$

PERSON A DOES THIS STEP

Finish the process, to write the equation in vertex form:

$$y = 2(x^2 + 6x + 9 - 9) + 20$$

$$y = 2(x + 3)^2 - 18 + 20$$

$$y = 2(x + 3)^2 + 2$$

Circle one: The vertex is a MAX MIN

PERSON C DOES THIS STEP

Graph the parabola, include 5 points and axis of symmetry:

4.  $y = \frac{1}{2}x^2 + 4x + 10$

PERSON A DOES THIS STEP

Factor the constant out of the first two terms:

$$y = \frac{1}{2}(x^2 + 8x) + 10$$

What number must be added, to complete the square?  $\left(\frac{8}{2}\right)^2 = 16$

Circle one: The parabola opens UP DOWN.

PERSON B DOES THIS STEP

Finish the process, to write the equation in vertex form:

$$y = \frac{1}{2}(x^2 + 8x + 16 - 16) + 10$$

$$y = \frac{1}{2}(x + 4)^2 - 8 + 10$$

$$y = \frac{1}{2}(x + 4)^2 + 2$$

Circle one: The vertex is a MAX MIN

PERSON C DOES THIS STEP

What are the coordinates of the vertex?

$$(-4, 2)$$

What is the equation of the axis of symmetry?

$$x = -4$$

What is the y-intercept for this graph?

$$\begin{aligned} y &= \frac{1}{2}(0 + 4)^2 + 2 \\ &= \frac{1}{2}(16) + 2 \\ &= 10 \\ &\quad (0, 10) \end{aligned}$$

PERSON A DOES THIS STEP

Graph the parabola, include 5 points and axis of symmetry:
